

PetroChina Daqing Completes Its First Metallocene Production Campaign Using UNIPOL™ PE Process

Houston, TX – [Univation Technologies, LLC](#) announced today that PetroChina Daqing Petrochemical Company became the first polyethylene producer in China to manufacture XCAT™ Metallocene LLDPE using Univation's proprietary technology and catalyst. Univation's metallocene LLDPE products offer superior strength, puncture resistance and excellent sealing properties which make it particularly well-suited for advanced packaging applications.

Daqing, the first plant in China to utilize Univation's [UNIPOL PE](#) technology, has been operating the facility successfully for nearly 20 years. With very minor modifications the plant produced state-of-the-art metallocene LLDPE products using Univation's XCAT HP-100 Catalyst. "This successful campaign demonstrated the technical expertise and capability of Daqing, while also proving that a UNIPOL PE investment remains state-of-the-art well into the future," noted Greg Stakem, Vice President Research and Development of Univation Technologies.

About Univation Technologies

Univation Technologies, LLC is the world leader in licensing gas phase polyethylene technology. Univation has comprehensive technology programs focused on the UNIPOL™ PE Gas-Phase Process, UCAT™ Conventional Catalysts, XCAT™ Metallocene Catalysts and PRODIGY™ Bimodal HDPE Catalysts. UNIVATION, XCAT, PRODIGY, and the stylized "U" are registered trademarks (Reg. U.S. Pat. and Tm. Off.) of Univation Technologies. UNIPOL and UCAT are registered trademarks (Reg. U.S. Pat. and Tm. Off.) of The Dow Chemical Company or an affiliated company of Dow. UNIPOL and UCAT are licensed for use to Univation Technologies.
